

## Epsilon now Provide HyperWorks, The Leading CAE Simulation Platform to Clients throughout the UK's Engineering Community

*Leading engineering software available to regional clients to inject innovation into design with the latest in virtual simulation technologies*

**2nd August 2010, Stevenage, UK** – Epsilon Structural Analysis Ltd a leading engineering solution partner has now become the newest member of the Altair Channel Program to resell the HyperWorks virtual simulation suite throughout the UK. Altair Engineering Ltd, a leading global provider of technology and services that empowers client innovation and decision-making, has announced that as part of the agreement, Epsilon, who have a great range of experience in providing computer aided engineering (CAE) solutions to major OEMs and tier suppliers throughout the UK's aerospace, automotive, marine and manufacturing industries, will provide and support the HyperWorks technology suite to companies within the region's growing design industries.

Built upon a foundation of design optimization, performance data management and process automation, HyperWorks is an enterprise simulation solution for rapid design exploration and decision-making. As the most comprehensive, open-architecture CAE solution in the industry, HyperWorks includes best-in-class modelling, analysis, visualization and data management solutions for linear, non-linear, structural optimization, fluid-structure interaction, and multi-body dynamics applications.

"We are very pleased to partner with Altair and be able to provide the HyperWorks CAE suite to the engineering community," said Alan Plumley, Sales Manager, Epsilon. "Many industries are under increasing pressure to improve product performance, bringing new solutions to market in ever shorter timescales at the time of an increasingly competitive global market. The productivity improvements that the HyperWorks product suite provides combined with Epsilon's commitment to the highest standards in client services, make this partnership an attractive proposition for our clients. We can now provide world leading analysis and simulation tools, and support they need to meet their global challenges."

"Epsilon is a premier structural analysis and computer aided engineering organisation and their deep knowledge and experience of practical engineering and design makes them well placed to provide their clients with the very best virtual simulation solutions available." said Dave Mason, Managing Director, Altair UK. "Epsilon, like Altair is committed to the continual development and promotion of leading engineering technologies".

### **About EPSILON**

EPSILON are an engineering solution partner for companies in the Aerospace, Automotive, Marine and Advanced Manufacturing Industries, providing software, consultancy and training. With over 11 years of experience in the CAE industry, Epsilon pride themselves in delivering high-quality value-added solutions to their clients. Epsilon are based in Stevenage, Hertfordshire, UK. **About Altair**

Altair Engineering, Inc. empowers client innovation and decision making through technology that optimizes the analysis, management and visualization of business and engineering information. Privately held with more than 1,300 employees, Altair has offices throughout North America, South America, Europe and Asia/Pacific. With a 20-year plus track record for enterprise analytics, product development, and advanced computing, Altair consistently delivers a competitive advantage to customers in a broad range of industries.
